

# MOWERS, TEDDERS AND RAKES

# DiscCutter™ F and DuraDisc™ F front mounted disc mowers.

The New Holland range of front mounted disc mowers is available in two distinct variants. The DiscCutter™ F is a high performance mower conditioner, available in 3.11 and 3.52 metre options, and features advanced contour flotation technology, enabling it to follow the ground accurately for even mowing performance. The DuraDisc™ F mower is available in a 3 metre model and benefits from a pendulum floatation system, designed to always follow ground contours.

# DiscCutter™ rear mounted mowers.

The five-model rear mounted DiscCutter™ mower range is available in 2.37 to 3.86 metre cutting widths, meaning operations can pick the perfect mower, whether working in narrow, irregular shaped fields, or large open spaces. The Vari-Float system helps maintain uniform cutting height and the durable cutting discs have been engineered to deliver top performance in all crops. The 2.37, 2.77 and 3.11 metre variants can be fitted with the optional PE-finger conditioner for improved wilting performance. The TopDry™ wide spreading system is ideal when fast drying or wetter crops are mowed.

# DiscCutter™ L and DiscCutter™ C trailed mowers.

Two models of trailed disc mower are available. The off-set lateral DiscCutter™ L models, available with a 3.11 metre cut are equipped with a spring floatation system, which reacts to ground pressure for uniform cutting. The centre pull DiscCutter™ C models are available in 3.11 and 3.52 metre options and share the same spring floatation system technology with L models. Both L and C variants can be specified with three different types of conditioner, choose between PE finger, steel flail and rubber chevron rollers to suit your operation. In order to protect the mower, the TopSafe™ technology is engaged when the mower encounters obstacles, such as rocks.

# ProTed™ tedders.

The ProTed™ range of tedders is available in both mounted and trailed specifications. The three mounted models feature working widths of 6.9, 7.6 and 8.8 metres, and for those looking to optimise the horsepower/width ratio, the trailed tedder is also available in the largest 8.8 metre width. The 6.9 and 7.6 metre variants are equipped with six rotors, and an additional two rotors are fitted to 8.8 metre models. Hydraulic field boundary clearing (which is engaged to direct cut crop away from the edge of the field for easier collecting) is standard on 8.8 meter models and an option on all others.

# ProRotor™ rotary rakes.

The New Holland range of rakes features the one rotor ProRotor™ model and the two rotor ProRotor™ C and ProRotor™ L variants. Versions include either side or central delivery and are available in seven working widths, from 4.2 to 8.2 metre. The advanced ProRotor™ L models can manage up to two swaths for faster swathing action. For the most demanding customers, the range topping ProRotor™ L 640T Auto-Steer benefits from automatic steering to ensure there are no underlaps between the front and rear rotors.

# New Holland Top Service: customer support and customer information.

## Top Availability

If you need information, or have an out of hours question, ring our toll-free number\*. All day, every day, we are just a call away.

## Top Speed

Express parts delivery: when you need it, where you need it!

## Top Priority

Fast-track solution during the season: because your harvest can't wait!

## Top Satisfaction

We drive and track the solution you need, keeping you informed: until you are 100% satisfied!

### For more details, ask your New Holland dealer!

\* Calls to the Top Service team are free from landlines in the United Kingdom and Republic of Ireland. UK-based mobile calls are also free, but Republic of Ireland mobile users should call 01 2421881 and this will be charged at your standard network rate.
